

Safety is paramount in coffee production

Client

Melitta Europa GmbH & Co. KG,
Bremen, Germany

Construction / Assembly site

Coffee business segment, Bremen

KAEFER services

Demanding fire protection work during ongoing coffee production at Melitta in Bremen.

Timeframe

September 2015

Safety Manager and Fire Protection Officer Jens Hohendorf at Melitta in Bremen is perfectly clear about it: „When it comes to the safety of colleagues, Melitta doesn't compromise. That concerns occupational health and safety as well as fire protection.“ So when a fire door at the plant in Bremen had to be replaced under particularly demanding technical and organisational conditions, he called KAEFER. Making alterations to the wall opening, adjusting the floor level and replacing the old fire door with a state-of-the-art model, all had to be carried out as quickly as possible and without creating any dust. We are delighted that with our support, Mr Hohendorf did not have to compromise his safety requirements in this case either.

> Heat insulation

> Cold insulation

> Noise protection

> Fire protection

> Scaffolding

Scope of work

- > Replacement of a fire door during ongoing operations
- > Working to strict hygiene and safety standards
